MILTON VELAZQUEZ

BACKEND & AI ENGINEER

Mexico City, Mexico | yamil.velazquez@live.com | WhatsApp +52 55 4682 6816

PROFESSIONAL SUMMARY

Backend developer with professional experience since 2023 in API development, enterprise integrations, and cloud services. Experienced in implementing AI solutions using Azure OpenAI and building serverless architectures with Python, AWS, and Azure.

PROFESSIONAL EXPERIENCE

Backend Developer | EnvíoClick *Mar 2026 – Present*

- Developed and maintained Python-based APIs and backend services for logistics and shipping quotation processes.
- Integrated logistics providers and external services into quotation, geolocation, and fulfillment workflows.
- Implemented caching mechanisms using Redis and MySQL to reuse data and reduce redundant requests to external services.
- Developed unit, functional, and integration tests; investigated production issues using AWS CloudWatch and log analysis.

Backend & Automation Developer | Pharma Shared Services *Nov 2023 – Mar 2026*

- Designed the microservices architecture for an AI-powered agent using Azure OpenAI and Azure Functions.
- Developed a conversational AI agent used by internal and external customers through Microsoft Teams and WhatsApp.
- Developed APIs, enterprise integrations, and bots using Python, Microsoft Bot Framework, and Azure services.
- Extracted data from PDF documents using OCR and integrated extraction workflows into document processing pipelines.
- Automated business processes using Power Automate and Power Apps; developed and maintained ETL and data integration pipelines.

TECHNICAL SKILLS

Backend & Programming: Python · FastAPI · Flask · REST APIs · SQL

Cloud & Serverless: AWS Lambda · AWS CloudWatch · Azure Functions · Azure

Applied AI: Azure OpenAI · OpenAI API · Microsoft Bot Framework

Data & Infrastructure: MySQL · Redis · BigQuery · Docker · Git

Automation: Power Automate · Power Apps

Additional Technologies: RAG · LangGraph · MCP

PERSONAL PROJECTS

Story Forge | Multi-Agent AI Content Generation System *In Development*

Technologies: Python · LangGraph · Ollama · RAG · TTS

Developing a multi-agent pipeline with specialized agents for writing, critique, fact-checking, and scene direction.

Integrating local and cloud-based AI models and text-to-speech synthesis to generate narrative content.

EDUCATION

Undergraduate Studies in Physics and Mathematics

Higher School of Physics and Mathematics (ESFM), National Polytechnic Institute (IPN)

Aug 2018 – Jan 2023

ADDITIONAL TRAINING

Docker · FastAPI · SQL and MySQL · Unit Testing · Software Architecture · Design Patterns and SOLID · RAG with Microsoft Azure · MCP with Microsoft Azure
